I am a professional iOS developer with four years of experience. I am very passionate about Swift. I have been in programming since 2009. Many of my apps are now live at app store. Pixel perfect design and best user experience is my passion. I always try to follow the best practice and love to take challenge.

Experience:

Pathao Inc. Limited — September-2017 to Present

Here I am working with a ride sharing app like Uber. Its not only a ride sharing app, rather than it's a collection of applications. Online food delivery, parcels feathers are available here. I made the food part from its scratch and improve the performance of ride sharing app. Thousands of users use this app. Here is the app link <https://itunes.apple.com/us/app/pathao/id1201700952?mt=8>. Actually it is the biggest bike sharing app platform in Bangladesh.

East West Media Group — September-2016 to August-2017

Here I am working in a Messenger application. You can find the app here <https://itunes.apple.com/us/app/gagagugu/id1228587989?ls=1&mt=8>. Free text messaging, audio, video call, user timeline and many other exciting features are available here. Here I am working with XMPP and Web RTC technology.

Digi Tech Bangladesh Limited — April-2015 to August-2016

Here I have experienced with Banking application. I made Online Banking application for iOS devices. I also made a desktop application called Cash Depositor Machine using Node-Webkit. Due to privacy policy I could not share the app details. Here I have also experienced with web application. I made a online portal app using Laravel for back-end and JS for front end.

RTC Hubs Limited — January-2014 to May-2015

I am starting my career as iOS Developer here. Working in Objective C with Cocoa Touch. I make couple of application that are currently now live at App store.

Skills:

Mobile App: Swift, Objective C, Sprite Kit, Scene Kit, Cocoa Touch
